EdgeTec **Auto Pack Station**

TAPERS

OPERATOR FRIENDLY

The side belt driven Auto Pack Station is designed for compact, packing, weighing and sealing. The durable design has proven to be one of the most reliable automatic case tapers on the market today, keeping production and maintenance efforts to a minimum. The Auto Pack Station provides a fast and cost-efficient alternative to hand taping.

PACKING, WEIGHING & SEALING MADE EASY

The Auto Pack Station is supplied with an anvil packing station to assist with the packing and sealing process. This anvil allows for weighing of your box and connects to most shipping programs for one click shipping label creation. Operation is simple: open the case and manually fold the bottom front and back minor flaps and place case on the anvil to be filled. Once filled, the correct weight can be taken and a shipping label can be printed. After folding in the top flaps, the box can then be taped using the Auto Tape Station.

LESS DOWNTIME

The Auto Pack Station offers the convenience to pack any size box, weigh it, then automatically seal the top and bottom. The Auto Pack Station utilizes EdgeTec's Easy Swap top and bottom tape heads and will seal boxes as narrow as 4.7" wide and as low as 6.1" tall.

INDUSTRIAL QUALITY

CE approved dual drive motors, aggressive industrial strength side belts and roller table make the Auto Pack Station a workhorse. Each machine is made from 12 gauge steel and will withstand the most rugged applications. The powder coated exterior protects the machine from harsh conditions.

CONVENIENCE

This machine accept 2" wide pressure-sensitive tape as a standard, or can be ordered with 3" tape heads. The use of EdgeTec's Auto Pack Station can be learned in minutes, avoiding breaks in production and downtime, saving your company money and increasing your ROI.

THE RIGHT SOLUTION

Rugged design. Proven reliability. Simple operation. Your benefits go on and on. When it comes to industrial operation, rely on EdgeTec to provide the right solution for your case sealing needs.
