EdgeTec **TBD Tape Station**

TAPERS

OPERATOR FRIENDLY

The top and bottom belt driven TBD Tape Station is designed for compact sealing. The durable design has proven to be one of the most reliable case tapers on the market today, keeping production and maintenance efforts to a minimum. The TBD Tape Station provides a fast and cost-efficient alternative to hand taping.

PACKING AND SEALING MADE EASY

Designed with the customer in mind, the TBD Tape Station is supplied with high quality rollers and front and rear packing and sealing process. Operation is simple: open the case and manually fold the bottom flaps and place case on a level surface to be filled. Once filled, the operator pushes down and holds the top flaps while the box enters the machine to be sealed.

LESS DOWNTIME

TBD Tape Station offers fast and easy case changes with adjustable side rails and flexibility for boxes 5.9" in length and greater. Adjustments can be made on the fly with easy hand tighten cranks. TBD Tape Station utilizes EdgeTec's Easy Swap top and bottom tape heads and will seal boxes as narrow as 7" wide and as low as 5.9" tall.

INDUSTRIAL QUALITY

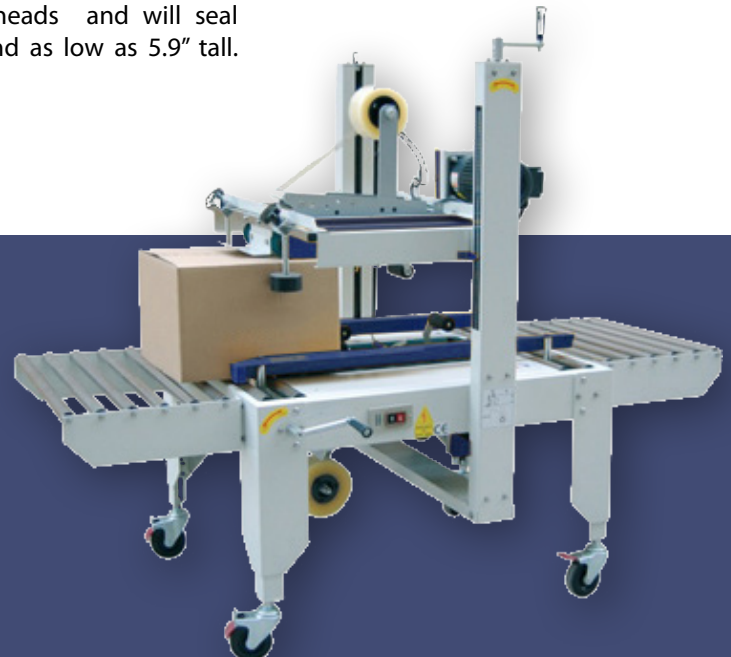

CE approved dual drive motors, aggressive industrial strength belts and roller tables make TBD Tape Station a workhorse. Each machine is made from 12 gauge steel and will withstand the most rugged applications. The powder coated exterior protects the machine from harsh conditions.

CONVENIENCE

These machines accept 2" wide pressure-sensitive tape as a standard, or can be ordered with 3" tape heads. The use of EdgeTec's TBD Tape Station case taping machine can be learned in seconds, avoiding breaks in production and downtime, saving your company money and increasing your ROI.

THE RIGHT SOLUTION

Rugged design. Proven reliability. Simple operation. Your benefits go on and on. When it comes to industrial operation, rely on EdgeTec to provide the right solution for your case sealing needs.
